

PLATFORM SCALES - BETA SCALES

Product Description

The BETA-Series includes scales with a rugged weighing platform, with an excellent price to performance ratio, designed to suit a variety of weighing applications.

Heavy duty conceived construction, with a stainless steel load plate and a reliable, approved load cell, ensure that the industrial demands in performance and accuracy are met to the maximum.

Basic Features

- Superior structural design and finish
- Steel construction (ST 37) and Stainless steel weigh plate
- OIML approved for 3,000div.
- Internal resolution: 1/600,000
- Responds quickly with great accuracy
- Standard stainless steel pan and dust cover
- Multiple platform capacities and portability
- Wash down housing design
- Power: Rechargeable battery powered
- Battery provide up to 90 hours of continuous use.

Capacities / Dimensions

	BETA-1	BETA-2	BETA-4
	350x450mm	420x520mm	600x800mm

The standard scale come with Indicator **LD5208**

LD5208 Basic Features

- Approved for 10,000divisions
- Up to 28 measurements per second
- Excitation for up to 10 strain gauge load cells, 1100Ω each or 4 strain gauge load cells, 350Ω (minimum input impedance 350hm)
- Large, 6 digit LCD (20mm) display with backlight.
- 6 keys membrane keyboard with tactile feedback
- Standard RS232 for PC or printer connection
- Mains adapter powered and by internal rechargeable battery
- Tactile keyboard with On/ Off, Zero, Tare, Totalizing, Print and Piece counting keys
- EU-type approved for legal for trade applications
