

PLATFORM SCALES - M 40

Product Description

M 40 is a series of platforms designed for weighing of heavy loads and volume products in industrial applications, with an excellent price to performance ratio. Robust industrial design and at the same time maximum portability and low profile, make this series the ideal solution for industry, transport, stock control, warehouse and any other kind of general purpose weighing. With a resolution of 3,000 approved divisions and dual range capability the M 40 platforms provide precise weighing data for the most demanding needs.

Basic Features

- Superior structural design for use in tough industrial environments
- Painted steel construction (ST37) for standard use, with double layer of industrial paint and perfect finish
- Stainless steel load cells IP67, OIML approved for 3,000div.
- 4 height adjustable feet

Capacities

The M 40 platform can be supplied in 300kg or 600kg or 1000kg or 1500kg or 2000kg or 3000 kg or 6000kg capacities with dual range capability

Options

A large variety of weight indicators (LCD display, aluminum housing or battery operation) is available

Dimensions

- 1,000 x 1,000m
- 1,250 x 1,250m
- 1,500 x 1,500m
- 1,500 x 2,000m
