

PALLET SCALES- P Scale

Product Description

P Scales is a series of pallet scales designed for weighing of heavy loads and volume products in industrial applications, with an excellent price to performance ratio. Robust industrial design and at the same time maximum portability and low profile, make this series the ideal solution for industry, transport, stock control, warehouse and any other kind of general purpose weighing. With a resolution of 3,000 approved divisions and dual range capability the P Scales provide precise weighing data for the most demanding needs.

Specially designed for forklift/ pallet applications.

Basic Features

- Superior structural design for use in demanding applications
- Stainless steel construction (AISI 304) for use in wet, washed down and harsh industrial environments
- Stainless steel load cells IP67/IP68, OIML approved for 3,000div.
- 4 height adjustable feet

Capacities

The P Scale can be supplied in 300kg or 600kg or 1000kg or 1500kg or 2000kg or 3000 kg capacities with dual range capability

Options

A large variety of weight indicators (LCD display, aluminum housing or battery operation) is available

Dimensions

- 0,600 x 1,130m
- 0,840 x 1,250m
- 0,960 x 1,260m
